About JNTU Kakinada

Jawaharlal Nehru Technological University Kakinada (JNTUK), Kakinada, East Godavari, Andhra Pradesh, has been established in the year 2008 by an Act of State Legislative Assembly by reorganizing the first Technological University of the Country, i.e. JNTU, Hyderabad.

The leadership qualities are groomed through a series of meetings and personal contacts with experts and top leadership from various Universities and Industries. This has created a positive attitude and a zeal among faculty to excel in their respective fields.

JNTUK focused on Science and Engineering disciplines, the university offers courses such as Civil, Electrical, Mechanical, Electronics, Computer Science and among other subject areas.

About JNTUK MOOCS

Technology has become the key to a new world of education. Online learning has become one of the most popular ways of gaining access to an education, especially to growing demand of the professional courses. Online learning offers new educational possibilities to all potential students: "If you can't reach to the mentor's level, we'll send the mentor to your level" is the main motto of MOOCS.

JNTUK is implementing Massive Open Online Courses (MOOCS) with emerging technology to survive the motto of excellence. MOOCS was introduced in July 2015 for all its constituent and affiliated colleges. Since then 16 courses were offered to 21206 students from 111 colleges.

The University allows graduate students to take courses online through Massive Open Online Courses (MOOCs). The students were given choice that either they can take online course or they can go for traditional face to face mode in the class room. Any student can attend the MOOCs classes without disturbing the normal face to face class room schedules.

- As far as the Massive Open Online Courses (MOOCs) courses are concerned, they are the same as that of regular courses w.r.t. credits, duration and evaluation.
- The main feature is that they are handled by Internal/ External experts from Institutes of Higher Learning and Industry.
- There is no financial Commitment from the colleges and the students.
- The College will identify a faculty member (Internal Mentor) to clarify and tutor the course from the university side in the respective colleges.
- JNTUK has a dedicated Coordinator for MOOCs
- JNTUK MOOCS got the appreciation from MHRD, UGC, State Government.

About the Workshop

In order to create more awareness in E-Learning/ MOOCs and Edu-Tech Tools to make class room teaching better JNTUK is organizing " One Day Workshop on "Empowering Teaching Excellence Through E-Learning Platforms on 8th July, 2017 (Saturday) at Senate Hall, JNTU Kakinada
