The Department is well equipped with the latest labs & infrastructure.

ABOUT WORK SHOP

Advanced materials are the modifications to the existing materials to obtain superior performance and characteristics which are critical to the application under the consideration. Mechanical Systems provides a way for new installations and retrofit applications as well as upgrade or replacement systems in various Engineering domains. This Workshop brings a more insightful and focussed approach to **Advanced Materials and Mechanical Systems** so that novel methods can be considered for implementation in their product and / or technology life cycle.
