JNTUK MoU with US firm to help students

DC CORRESPONDENT
KAKINADA, JULY 17

Jawaharlal Nehru Technological University Kakinada inked an MoU with Tetrasoft Inc, St. Louis, USA, on Tuesday at the Conference Hall of JNTUK, Kakinada, to set up a digital excellence wing at the incubation centre of the university.

The MoU was exchanged between university registrar Prof V.V. Subba Rao and CTO of Tetrasoft Surya Thammiraju. The partnership will help in addressing the skill gap in making the students industry-

ready and also in nurturing innovation and entrepreneurship among students having a passion for innovation.

This digital excellence centre will focus on automation and devops, big data and analytics, cloud integration and mobility and business process management.

The director of the incubation centre Prof J.V.R. Murthy coordinated the programme. JNTUK and Tetrasoft partnership will be a win-win for both JNTUK and Tetrasoft benefitting the students sharpen their skill and industry exposure. The JNTUK

in-charge vice-chancellor Prof S. Ramakrishna Rao highlighted that digital excellence centre at JNTUK will significantly help the students in sharpening their technology skills in latest digital areas. He said that joint collaboration will accelerate the readiness of students to global industry needs and make them employable.

It will provide Tetrasoft and other IT firms access to strong talent pool. Prof K. Purnanandam, rector, directors, vice-principal, Srirama Evani, chief operating officer, Tetrasoft and faculty were present.

MoU to address skill gap

STAFF REPORTER
KAKINADA

In a bid to make its students 'industry-ready' by addressing skill gaps, the Jawaharlal Nehru Technological University, Kakinada (JNTUK) on Tuesday entered into a Memorandum of Understanding (MoU) with U.S.-based Tetrasoft Inc, at a programme held at the University conference hall.

JNTUK Registrar V.V. Subba Rao and chief technical officer of Tetrasoft Inc. Surya Thammiraju signed the MoU in the presence of in-charge Vice-Chancellor S. Ramakrishna Rao.

Prof. Rao said that the MoU would help set up a digital excellence centre focussing on automation, big data and analytics, cloud integration and mobility and business process man-
